

British Council Activity:1
Primary Section
Month: July 2022
Theme: Forests:
Nature's Biggest Treasure

FORESTS ARE THE LUNGS OF THE WORLD

BCM School aims at producing global citizens. Therefore continuing British Council International Activities, different activities were organized for primary kids on the theme “Forests: Nature’s Biggest Treasure”. These activities aimed at to acquaint the students with different types of forests depending upon the different climatic conditions and how they serve as a big treasure of resources for any country. Not only this, the activity also aimed at generating a sense of responsibility towards nature and think as a global citizen.

Young BCMites got familiar with the spread and type of forests in India, Nigeria and USA. They also learnt about various programmes initiated by all the governments of the countries under study to conserve this natural treasure. Subject experts acquainted the students about our dependance on forests for our survival and for many forest products. And how forests help in creating the environment suitable for our living. BCMites perceived that it’s high time that all the countries should make joint efforts to save earth by saving our forests.

FOREST FORAGE

Students learning about importance of forest

IMPORTANCE OF FORESTS

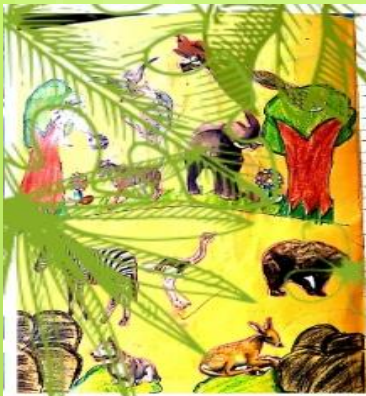

A BRAINSTORMING SESSION FOR STUDENTS

SCRAPBOOK ACTIVITY

Students prepared scrap books on different types of forests found in India, Nigeria and USA and means to conserve the forests.

FOREST
 FOREST are huge areas of land thickly covered.
 They trees, bushes and grasses.
 Forest include flora and fauna

IMPORTANCE OF FORESTS

- * Forests are the lungs of the earth. They take in carbon dioxide and give out oxygen, making the air pure.
- * They check soil erosion.
- * They are the main source of wood. We also get rubber, paper, gum, etc. from forests.
- * They give us herbs which are used to make medicines.
- * They give shelter and food to many animals and birds.

TYPE OF FOREST

S.No	India	Nigeria	U.S.A
1.	Deciduous	Rain forest	Tropical
2.	Thorny	Mangrove	Temperate
3.	Coniferous	Juniperus Samanias	Borax
4.	Mangrove		

	India	Nigeria	U.S.A
	80.9 million hectares	9.01 million hectares	309 million hectares
	26.52% of the geographical area of the country	9.97% of the geographical area of the country	66.97% of the geographical area of the country

BRITISH COUNCIL ACTIVITY
FOREST
OUR GREEN TREASURE

Importance of forest

- Taking in CO₂ and releasing O₂
- Preventing erosion
- Harboring a diversity of wildlife
- Reservoir of watershed
- Acting as windbreak
- Providing us with shade
- Helps happenings adequate rainfall
- Climate stabilization
- Provides fuel
- Source of food
- Rubber products
- Paper and newsprint products

Steps taken
Government to conserve the forests.

- Every year during the rain season, huge number of saplings are planted under various programs of **Van Mahotsav**.
- Forest conservation act

Several rules and regulations have been made for conservation of forests and the forest conservation act has been implemented.

Conclusion

- Our forests are our life line.
- All the countries across the world must join together to save the forests and take steps like -
- Reforestation
- Protection of forests from fire
- Making laws of forest conservation
- Develop National Parks
- Survey of forests resources.

POSTER MAKING

On the basis of knowledge gained students prepared posters on the theme “Forest Conservation”

MEDIA REPORT

BCM enhances students' knowledge about types of forests

LUDHIANA : At BCM School, different activities were organised under British Council international collaborative for students of the primary section. These activities helped them to develop a global perspective in appreciating the natural

resources and to work for their preservation. These activities enhanced students' knowledge about different types of forests found in India, Nigeria and USA. They learnt about the importance and need for forest conservation programmes at a global level.

CAMPUS NOTES
