Students Gain Real-World Experience Through Diverse Summer Internships

During the summer break, senior students of BCM School made the most of their time by engaging in a variety of internships across diverse professional fields. From gaining hands-on exposure in hosiery units to understanding the intricacies of finance and law, the students explored career paths with enthusiasm and commitment.

Several students interned with reputed chartered accountancy firms and legal advisors, while others explored physiotherapy clinics and manufacturing industries to understand day-to-day professional functioning. These internships not only enriched their subject knowledge but also helped them develop practical skills, discipline, and workplace ethics.

The school applauds the students' proactive approach towards learning and career exploration. Such initiatives reflect BCM's commitment to nurturing future-ready citizens who learn beyond textbooks and engage with the real world.

Breathing Life into Sustainability: Green School Initiative in Action 🌱

As part of the Green School Project, a group discussion on the topic "Air – Breath of Life" engaged students in thoughtful conversations about the significance of clean air and the collective responsibility to reduce air pollution. Students shared insightful ideas, with the best suggestions including promoting alternative transportation such as cycling and carpooling, increasing green cover through tree plantation, and reducing energy consumption by turning off unused electrical devices.

The discussion was aimed at identifying practical steps to improve environmental practices within the school, focusing on areas like recycling, energy conservation, and waste management. The activity successfully instilled a sense of environmental responsibility among students, and the ideas generated will be considered for future implementation to help create a cleaner and healthier school environment.

Thought of the day:

"Don't limit your challenges.

Challenge your limits." ✨

Book of the day:

📖 *"The Boy Who Harnessed the Wind" by William Kamkwamba & Bryan Mealer*

> *An inspiring true story of a young boy from Malawi who used his curiosity and determination to build a windmill and bring electricity to his village. A powerful tale of innovation, resilience, and hope.*

Health tip of the day:

🥦 *Include at least one green vegetable in your meals daily.*

Leafy greens are rich in iron, fiber, and essential vitamins that boost immunity, improve digestion, and keep your skin glowing.
