Sports form an integral part of a well-rounded education system, contributing significantly to the physical, mental, and social development of students. In today's competitive academic environment, the importance of sports in schools has become more relevant than ever.

Engagement in sports activities promotes physical fitness, enhances endurance, and encourages a healthy lifestyle among students. Regular participation not only strengthens the body but also improves concentration, thereby positively impacting academic performance.

Beyond physical benefits, sports instill essential life skills such as discipline, teamwork, leadership, and perseverance. Students learn to collaborate effectively, respect rules, and develop a sense

of responsibility—qualities that are crucial for success in both personal and professional life.

Furthermore, sports play a key role in building character. They teach students how to handle success with humility and face failure with resilience. Such experiences prepare them to overcome challenges and adapt to different situations with confidence.

Schools, therefore, must actively encourage sports participation by providing adequate facilities, proper training, and opportunities for competition. A balanced approach that integrates academics and sports fosters the development of confident, capable, and well-disciplined individuals.

CLASS PRESENTATION

“From Passion to Purpose – A Journey of Perseverance, Expression, and Inspiration.”

The Class Presentation of VIII B was held on 15th April 2026 in the school auditorium on the theme ‘Turning Passion into Action’, reflecting the value of the month, Perseverance. Students highlighted the importance of determination through speeches and an impactful role play, ‘60 Seconds Courtroom’, promoting empathy. Another role play showcased inspiring Indian personalities, motivating students to pursue their dreams.

A Bhagavad Gita shloka and Arya Samaj teachings emphasized duty, truth, and self-discipline, while a patriotic group song added enthusiasm. The presentation concluded with a vibrant fusion dance, symbolizing the blend of tradition and modernity. All students participated confidently, effectively conveying the theme.

BCM SCHOOL CHANDIGARH ROAD FOUNDATIONAL STAGE ENHANCES NUMERACY SKILLS THROUGH FUN LEARNING ACTIVITY

BCM School Chandigarh Road Foundational Stage conducted an engaging numeracy activity for young learners using wooden trays and abacus to strengthen foundational math concepts. The activity aimed at developing counting skills, number recognition, and quantity association through interactive hands-on experiences.

Students enthusiastically explored numbers by arranging and counting objects in wooden trays, making learning both meaningful and enjoyable. The abacus session helped children practice counting in a playful manner while improving concentration, hand-eye coordination, and fine motor skills.

The activity provided an effective blend of learning and fun, encouraging active participation and building confidence in early mathematical understanding among the students.

ECONOMISING RESOURCES FOR A SUSTAINABLE LIVING

Economising resources is essential for achieving sustainable living in a world facing environmental challenges and limited natural reserves. It involves using water, energy, and raw materials wisely to reduce waste and preserve them for future generations. Simple habits like turning off unused lights, fixing water leaks, recycling materials, and choosing reusable products can make a significant difference. Sustainable living also encourages the use of renewable energy sources such as solar and wind power, which reduce dependence on fossil fuels. By conserving resources, individuals not only lower their expenses but also contribute to protecting ecosystems and reducing pollution. Collective efforts in economising resources can lead to a healthier planet, ensuring that future generations inherit a balanced and thriving environment.

Here are some suggestions by which resources can be optimally and economically used like share of textbooks with classmates, Using libraries instead of buying books, opting split subscriptions and saving a small amount regularly builds discipline. For example, save a fixed percentage of your pocket money each month. Instead of taxis or private rides, use buses, trains, or cycle when possible--it saves a lot over time.

Follow a "24-hour rule" before buying something non-essential. Most of the time, you'll realise you don't really need it. Eating out frequently is expensive. Try simple home-cooked meals or choose affordable meals.

In conclusion, economising resources is not just a choice but a responsibility for ensuring a sustainable future. By making small, mindful changes in our daily lives we can create a significant positive impact on the environment. These habits not only help in preserving natural resources but also promote financial discipline and a balanced lifestyle. When individuals come together to adopt such practices, it leads to collective progress toward a cleaner, greener, and healthier planet. Ultimately, sustainable living through resource conservation ensures that future generations inherit a world that is rich in resources and full of possibilities.
