STREAM SELECTION & CAREER GUIDANCE SESSION FOR GRADE X STUDENTS

BCM School organized a Stream Selection and Career Guidance Session for the students of Grade X with the objective of enabling them to make informed academic and career choices after their board examinations.

The session was conducted by Ms. Tarveen Kaur, Head – Outreach and Career Counsellor, who guided students on the significance of choosing the right stream in alignment with their interests, aptitude, and future goals. She provided a clear understanding of the various streams available after Class X and emphasized the role of thoughtful decision-making in shaping a successful academic journey.

Students were introduced to a wide spectrum of career options across Science, Commerce, Humanities, and emerging skill-based domains. The session also highlighted evolving career trends, future-ready skills, and the importance of adaptability in today's dynamic professional environment.

The interactive session encouraged active participation from students, allowing them to seek clarity on stream selection and long-term career prospects. The session proved to be highly informative and empowering, equipping students with confidence and direction for their future. BCM School continues to remain committed to guiding students through structured and meaningful career guidance initiatives.

SOUNDS, SMILES AND STORIES: A FUN-FILLED PHONICS SESSION FOR NURSERY

To strengthen early phonetic awareness and lay a strong foundation for language development, a joyful Phonic Sounds Activity using 'e' blocks was conducted for the Nursery students at the Foundational Stage. The activity was thoughtfully designed to help young learners recognise and associate sounds with letters through interactive and hands-on learning.

Using colourful 'e' blocks, the children enthusiastically participated in identifying sounds, forming simple words, and responding to verbal cues. The playful approach encouraged active involvement, improved listening skills, and enhanced sound recognition in a natural and engaging manner. The classroom resonated with excitement as the tiny learners explored phonics through movement, repetition, and guided interaction.

The session not only made learning enjoyable but also helped build confidence and curiosity among the children. Such activities play a crucial role in developing early reading readiness and fostering a love for language at a young age, making the learning experience both meaningful and memorable.
